Ornamental lawns and shaded areas.		Superior wear tolerance	Colour ■■■■■■■■■■■■■■■■■■■■
		High <i>fusarium</i> resistance	Red thread tolerance ■■■■■■■■■■■■■■■■■■■■
		Maintains nice appearance during winter	Salt tolerance ■■■■■■■■■■■■■■■■■■■■
			Close mowing tolerance ■■■■■■■■■■■■■■■■■■■■

### Great appearance

The general appearance is at a high level and is very constant throughout seasons and environments with high adaptation to main uses.

### High disease tolerance

CAPRICCIO shows excellent tolerance to common diseases such as Red Thread and Rusts. The resistance to *fusarium* (*Gerlachia nivalis*) is better than in most other varieties of chewings fescue.

### Dense, fine and valuable mixture component

CAPRICCIO is very winter hardy and will add extra persistency to mixtures intended for cold areas and largely contribute with improved density and fineness. With scores 8 -8\*-7 on the German RSM list the high quality is further underlined.

### Wear tolerance far above average

Generally chewings fescues don't exhibit high wear tolerance, but CAPRICCIO shows a markedly higher tolerance than the majority of chewing's fescues, extending the possible uses and allowing for better persistency.
